

Built for the Farm. Ready for the Rows.

Yanmar Vi080
with Post Pounder

Yanmar Excavator and Tracked Skid Steer

The **Yanmar Vi080 excavator** with our Roccbreaker Post Pounder attachment is the ideal solution for farmers who need precision, power, and reliability in tight spaces. Now available at Rocrents, this compact yet capable machine makes fence and trellis installation faster and easier—without tearing up your orchard or fields. Designed with zero tail swing and strong hydraulic performance, the Vi080 can navigate between rows while the post pounder efficiently drives posts to required depth.

- Orchard trellis system installation
- Fence and livestock containment projects
- Vineyard and farm fence infrastructure upgrades

Rocrents also carry the compact, powerful, and versatile **Yanmar TL80 and TL100 Tracked Skid Steer loaders**, which are ideal for material handling, truck loading, field prep/grading, and running all sorts of attachments.

Yanmar TL80

Dozers John Deere 700K & 650K

Dependable pushing power and fine grading performance for orchard prep, land clearing, farm roads, and more—built tough for all terrains.

Whether you're managing an apple orchard, building infrastructure, or preparing land for planting, RocRents has the machines to help you do more in less time.

John Deere 700K

John Deere 650K

Whether you're managing an apple orchard or fencing a new pasture, RocRents has the equipment to keep your operation growing strong.

Flail Mower

Rock Bucket

Brush Cutter

RockxBreaker

High-Performance Attachments

Quickly turn tough jobs into finished jobs with the Rocrents range of landscape attachments.

- **Flail Mower** (Excavator) – Clean up overgrowth and mow between rows without damaging the soil
- **Brush Cutter** (Skid Steer) – Tackle thick brush and field edges with ease
- **RockxBreaker 950IP** (Excavator) – Hydraulic breaker for rocks, concrete, and stubborn ground conditions
- **Rock Bucket** (Skid Steer) – Sift debris, clear land, and prep planting areas efficiently

Digga Augers

Precision Drilling Power You Can Count On

Featuring heavy-duty drive units, high torque output, and a variety of machine fitment applications, Digga auger drives deliver the power and versatility needed for both agricultural and construction applications alike.

Digga Auger

3-point Attachments

Rocrents have a range of 3-point attachments ideally suited to farm/orchard use, such as box blades, rotary cutters, rakes and more.

Tough Jobs, Total Control

14–20 Ton Excavators with Hydraulic Thumb

Take on demanding work with confidence using our 14–20 ton excavators—ranging from the Cat 315FL and 320 to the Volvo EC220. These machines are built for performance in heavy digging, lifting, and material handling applications. The added hydraulic thumb gives you superior grip and control for handling debris, loading trucks, placing rock, or working in tight conditions. Whether you're clearing land or handling demolition, this setup gives you the strength and versatility you need to stay productive and precise.

Whether you're managing an apple orchard or fencing a new pasture, RocRents has the equipment to keep your operation growing strong.
